## International Day of Light

UNESCO proclaimed May 16 as the International Day of Light (IDL), the anniversary of first successful operation of a laser in 1960. It is for the continued appreciation of light and the role it plays in science, culture and art, education, and sustainable development, and in fields as diverse as medicine, communications and energy. Worldwide participation in various activities is to demonstrate how science, technology, art, and culture can help achieve the goals of UNESCO – education, equality, and peace. The International Day of Light flagship event will take place at the Headquarters of UNESCO in Paris on May 16, 2018. The details of IDL may be found in <https://www.lightday.org>. Several local organizers around the world are celebrating this International Day of Light.

IEEE Photonics Society Calcutta Chapter is celebrating the first International Day of Light through a series of presentations by Doctors with the event title “*Lightwave Technology for Medical Diagnosis and Treatment*” to make all aware of the role of light in medical field.
